Believe it or not, we are now past the middle of August. Where did the time go?! Below are a few photos and updates from summer construction this past week.

**Kings Park High School**

- **KPHS Pavement and Electrical Upgrades**

This project is nearing completion. All of the LED lights along the perimeter of the parking lot have been installed, and the lights should be 100% operational in the coming days. Crews have back filled and seeded the ground that was disturbed and installed a new fence along the portion of the parking lot that is adjacent to the softball field.

- **KPHS Concession Stand Upgrade**

The septic system was installed this past week, and construction on the building has begun. This area will be fenced off for safety reasons until the project has been completed. We do anticipate that work on this structure will continue into the school year but be completed prior to Homecoming.
• Library Media Center

Although not visible to the public, we have been finalizing work on the KPHS library media center this summer. This work included some additional AC upgrades in our server room as well as an additional emergency exit on the second floor of the media center. This work should be completed prior to the start of the school year.

William T. Rogers Middle School

• WTR Roof Replacement Project

The work on the lower portions of the roof has been completed. Should you need to visit WTRMS, please avoid the fenced in area on the left side of the building. The remaining roofing materials and fencing should be removed shortly.

• WTR Locker Room Renovations

Last week we put a fresh coat of paint on the walls in both the girls and boys locker rooms. The new lockers are scheduled to be installed next week. This project will be completed by the start of school.
Check your email and our school district website (www.kpcsd.org)
this summer for additional weekly updates!

Thank you, and have a great week!

Timothy T. Eagen, Ed.D
