Believe it or not, next week is the last week of the summer. Sigh… Where did the time go?! Below are a few photos and updates from summer construction this past week.

**Kings Park High School**

- **KPHS Pavement and Electrical Upgrades**

This project is done. All of the LED lights along the perimeter of the parking lot have been installed, and the lights should be 100% operational in the coming days. We are just performing a few final touches on a few of the light heads to ensure that the light shines into the parking lot and not into the backyards along Lordly Court.

- **KPHS Concession Stand Upgrade**

Visible construction on the building began this past Wednesday and is now in full swing. This area will be fenced off for safety reasons until the project has been completed. We do anticipate that work on this project will continue into the school year but be completed prior to Homecoming.
• Library Media Center

Although not visible to the public, we have been finalizing work on the KPHS library media center this summer. This work included the installation of several new computers (see below), additional AC upgrades in our server room, and an additional emergency exit on the second floor of the media center. This work should be completed prior to the start of the school year.

William T. Rogers Middle School

• Field Irrigation System

The system has been completed, and our fields have never been in such good shape!
• WTR Locker Room Renovations

This summer we completely gutted the boys and girls locker rooms at WTRMS. The construction work is done, and the new lockers are scheduled to be installed on Monday. This project will be completed by the start of school.

Thank you, and have a great weekend!

Timothy T. Eagen, Ed.D
