The summer is here, and facilities work is now in full swing! Below are some photos of the work that either began this week or will begin next week.

**Kings Park High School**

- **KPHS Pavement Upgrades** (back parking lot and sections of the main entrance)

  This work is ongoing and will continue for two more weeks. The project is scheduled to be done by the end of July. During this time, the back parking lot at KPHS will be off limits, and we will also be doing some minor cement and blacktop work in the front of the building. Until further notice, kindly access the building and fields using the front parking lot only.

- **KPHS Locker Room Project**

  We were excited to finally received NYSED approval on the plans for the KPHS locker rooms this week. While it is probably too late in the summer to acquire competitive pricing and complete this work, it is good that this project has finally been approved and we can move forward at the earliest opportunity.
• KPHS Concession Stand Upgrade

This past week we began work on the new concession stand. This work should become more visible next week. The new concession stand is a pre-fab unit (same company used by the KPFD for their recently installed Annex). Installation is scheduled for early August once the back parking lot is done.

William T. Rogers Middle School

• WTR Roof Replacement Project

Work on the new roof began on Monday, June 25th and will continue throughout the summer. This past week we hit a BIG snag with the project. While removing sections of the higher portions of the roof, asbestos tar was discovered. Thus, unanticipated asbestos abatement is now needed. While we will be able to proceed with work on the lower portions of the roof as originally planned, the upper portions will require additional time and work, which will also significantly impact our budget. More details should be forthcoming shortly. The staff parking lot on the RJO side of the building will remain off limits. The main entrance is currently open, but will not be accessible at times during the summer. If you need to visit WTR, please proceed with caution and adhere to all posted signage.
• WTR Irrigation Project

Earlier this week, the vendor began placing small colored flags where various components of the new irrigation system will be installed. Sprinkler heads and composite piping will be installed on all fields during the coming weeks. To avoid injury and damage to the system, kindly avoid using these fields until further notice.

• WTR Lock Room Renovations

This week we began gutting and renovating both the boys and girls locker rooms at WTRMS. At this point, the old lockers have been completely removed and the new lockers will be installed later this summer.
Check your email and our school district website (www.kpcsd.org)
this summer for additional weekly updates!

Thank you, and have a great weekend!

Timothy T. Eagen, Ed.D
