Believe it or not, we are at the half way mark with summer construction. Below are a few photos and updates from this past week.

Kings Park High School

- KPHS Pavement Upgrades (back parking lot and sections of the main entrance)

The work in the front of the building has been completed, and the work on the back parking lot is still ongoing. From the photo below, you will see that the drainage dry wells have all been installed, and the large piles of sand and dirt are gone. They began installing the new curbs this week, and the next stages will be ground leveling and preparation, followed by paving. The back parking lot is scheduled to be done by the end of July. Until further notice, kindly continue to access the building and fields using the front parking lot only.
• KPHS Concession Stand Upgrade

This past week we finalized the exact location of the new concession stand. This work should become more visible next week, including the demolition of the existing Kingsmen Kafe. The new concession stand is a pre-fab unit (same company used by the KPFD for their recently installed Annex). Installation is scheduled for early August once the back parking lot is done.

William T. Rogers Middle School

• WTR Roof Replacement Project

Work on the new roof began on Monday, June 25th and will continue for the next few weeks. As was reported last week, while removing sections of the higher portions of the roof, asbestos tar was discovered. Thus, unanticipated asbestos abatement is now needed. We will be completing the work on the lower sections of the roof this summer, and finishing the remaining parts of the roof next summer. This will allow us to properly plan and implement a safe abatement project that can be completed while school is not in session. If you need to visit WTRMS while they are completing the work on the lower roof sections, please proceed with caution and adhere to all posted signage.
• WTR Irrigation Project

The irrigation system is nearing completion. Piping and sprinkler heads have been installed on the football/lacrosse field, ball fields, and soccer fields. To avoid injury and damage to the system, kindly avoid using these fields until the vendor has completed the installation.

• WTR Lock Room Renovations

This week we began work on the ceilings and lighting. The old lockers have been completely removed and the new lockers will be installed later this summer. This project will continue for the next few weeks.

Check your email and our school district website (www.kpcsd.org) this summer for additional weekly updates!

Thank you, and have a great weekend!

Timothy T. Eagen, Ed.D
